---

Josh,

In order to gather some additional information to assist in various ideas we are looking at for the lighting along the west property line at the TAFS Facility, I and an Engineer will be taking light level readings along the property line, and possibly onto the neighbor's property directly west of the screen wall as well as in the vicinity of the fueling station.

Our intent is to do this **Monday, January 25, 2021 starting at 6:45am. If it is raining or snowing, we would then postpone until Friday, January 29, 2021 starting at 6:45am.**

Thank you for assisting me in getting this word out. I don't want to alarm anyone.
